

T.P. the Universe

After going through the Eras section on the Unviersadventure.org website. Pick an appropriate time scale and construct a timeline showing these events. Compare and discuss the different time scales and their advantages and disadvantages.

Comment to teachers:

- 1) Leave the bag the T.P. came from because students hopefully will realize they can use the sheet length as a length measurement and the bag states how many sheets are per role.
- 2) You might want to help guide students or at least one student group to make a log time line. This is a great opportunity to teach and apply logs and why scientists use scientific notation.
